

Table 3: Confirmation of a Capillary Blood Lead Test for Children

Capillary Blood Lead Level ($\mu\text{g/dL}$)	Confirm with Venous blood lead test with-in:
3-4 $\mu\text{g/dL}$	3 months¹
5-9 $\mu\text{g/dL}$	1 month
10-19 $\mu\text{g/dL}$	1 week- 1 month
20-24 $\mu\text{g/dL}$	1 week
25-44 $\mu\text{g/dL}$	48 hours
45-59 $\mu\text{g/dL}$	24 hours
60-69 $\mu\text{g/dL}$	Immediately
>70 $\mu\text{g/dL}$	Immediately
1. Blood lead levels may vary seasonally and need to repeat in 1-3 months during the summer months when blood lead levels may be higher and repeat in 6 months during the winter months when blood lead levels may be lower
